Forty-Nine HARP Students go to the Hospital! (To Learn)

Ninth graders from the Academy of Health Science (HARP) attended a field trip to The Morristown Medical Center and The New Jersey Sharing Network in New Providence. During the hospital tour, the freshmen participated in a panel discussion with several health care professionals who are employed at the hospital. "It was great to hear about the different professions that we did not know about," said 9th grade student, Shyan Lindsay.

Students also learned about the high school and college courses that they will need to prepare them for various health science careers. During the second leg of the trip, the freshmen had the opportunity to tour the facility and learn how human organs are stored and kept viable prior to being transplanted. Student Wyzir Martin stated that the trip was, "Unbelievable." This amazing experience was made possible by Mitch Morrison founder of the *Student Success Business Program*.

A Tasty Novel and Novel Ideas at School 1

The Chocolate Touch is a novel read as part of the 3rd grade Language Arts curriculum. After reading the book, School 1 students were given several choices on how they wanted to present their understanding of the novel. Some students dressed up as characters, created quote hats, or even their own unique, creative ideas! It's wonderful to see the students learning and having fun!

District Events
